

To Our Valued Patients,

Infection control has always been a top priority for our practice and you may have seen this during your visits to our office. Our infection control processes are made so that when you receive care, it's both safe and comfortable. We want to tell you about the infection control procedures we follow in our practice to keep patients and staff safe.

Our office follows infection control recommendations made by the American Dental Association (ADA), The U.S. Centers for Disease Control and Prevention (CDC), and the Occupational Safety and Health Administration (OSHA). We follow the activities of these agencies so that we are up-to-date on any new rulings or guidance that may be issued. We do this to make sure that our infection control procedures are current and adhere to each agencies' recommendations.

-Pre Screening- We will screen each patient at the time of scheduling the appointment and at the time of check in.

-Direct to Room- You will be asked to call us when you arrive and then wait in your car until called. When called the patient will then be taken directly to your treatment room minimizing any unnecessary contact.

-Protect Yourself- We offer hand sanitizer and a pre procedural rinse.

-Pre Procedural Rinse- Is an antiviral rinse shown to be effective against viruses

-Patients and Team-

Members Temperature Screening- Our staffs temperature is screened daily and all patients will be screened for temperature prior to be taken to a treatment room

We look forward to seeing you and your family again and are happy to answer any questions you may have about the steps we take to keep you and every patient safe in our practice.

Sincerely,

Dr Rudy Gamarnik, Dr Scott Christensen and the entire Advanced Dental Team
